A response to the Voice of Young Science

Our last circular 'Homeopathy Action Alert', sent out in response to the Voice of Young Science network's attack on homeopathy, has triggered an overwhelmingly positive response. Of the many letters sent we thought we'd share this particularly compelling response to the WHO from Dr Cyril Smith:

"It has been brought to my attention that homoeopathy has again come under attack and that the WHO has acquired a complicity in this. I have been in research for 60 years and over the past 35 years have investigated the interactions of electric and magnetic fields and radiation with living systems and water. In 1982, I commenced an involvement with patients who had become sensitive to their electromagnetic environment. It quickly became clear that the relevant parameter was frequency. This work was presented at the "Man and His Environment in Health and Disease" Annual Symposia in Dallas TX . 1986-1994, 1997, 2000, 2005 & 2007.

Study of the physics of water¹ led to a basis in physics for homoeopathy² and acupuncture. In brief, one is looking at the properties of coherent systems within which frequency has become a fractal quantity thereby linking the chemical to the technical to the biological bands of frequency, all of which interact. The coherence of a frequency in water can be of the order of parts per million. If there was not a duality between chemicals and frequency, spectroscopic analysis would be impossible. It is coherence and fractality that inter-links these frequency bands. The study of imprinting and erasing frequencies in water led to the realisation that a homoeopathic potency is a pattern of frequencies initially determined by the frequency signature of a chemical H-bonded to water but, thereafter the processes of potentisation develop a frequency pattern irrespective of whether any chemical remains². A pharmaceutical can have a homoeopathic activity as well as a chemical one. Last month, I presented a physical basis for the measurement of these frequencies³.

Each acupuncture meridian has a characteristic frequency which can indicate stress on a body organ or system. Therapeutic frequencies come from 'needling' acupuncture points or a homoeopathic potency with the appropriate frequency pattern. Frequencies in the electromagnetic environment can have a homoeopathic activity generating homoeopathic "proving symptoms" in healthy persons so exposed. These 'alternative' therapies can operate on body systems which are in a state of mathematical chaos between health and disease and from which it is mathematically impossible to do a double-blind trial even under identical initial conditions⁴. A criticism which is often levelled against homoeopathy.

Cyril W. Smith, PhD”.

We apologise for the mistakes in the letter included in the last circular. Although it wasn't written by us we should have checked it.

Nobel Prize winner investigates high dilutions

Professor Luc Montagnier, who was awarded the Nobel Prize for AIDs research has investigated the electromagnetic properties of high dilutions of DNA from pathogenic bacteria and viruses. To read more [click here](#).

Homeopathy and depression

A new study on the treatment of depression with homeopathy was published by eCAM (the online journal published by Oxford University Press). The researchers note that the study had limitations besides the lack of a placebo control, such as dependence on a single homeopathic practitioner, a relatively small sample and a short period of treatment - the acute phase of depression, but they point out that in spite of its limitations, it illustrates the feasibility of randomized controlled double-blind trials of homeopathy for depression. Camexpo 2009

DON'T MISS OUT ON YOUR £5 TICKET TO CAMEXPO – THERE'S STILL TIME TO BOOK!

Established over seven years ago to meet the needs of the entire complementary healthcare industry, **Camexpo** influences, inspires and brings together the whole CAM community like no other event. Now the UK's biggest trade and professional show - no other UK show boasts such a comprehensive array of CAM products and services or provides you with as many networking and training opportunities.

The show's 150 exhibitors include representatives from all the major associations and many leading educational organisations, along with the industry's top suppliers and

manufacturers. Therapists wishing to invest in their professional development can choose from a multitude of CPPD accredited Taster Workshops and FREE Keynote Seminars. Don't miss Dr Robert Verkerk, Jan de Vries, Dr Rosy Daniel, Patrick Holford, Dr Marilyn Glenville, and Dr Mark Atkinson, plus a whole host more. For further information about camexpo please visit their website www.camexpo.co.uk.

Taking place over two action-packed days on 24-25 October at Earls Court, London, Homeopathy: Medicine for the 21st Century members who book their ticket to **Camexpo** before 24 September pay just £5! **Quote: camex117** (£18 on the door.) To register, please call 01923 690696 or visit www.camexpo.co.uk

And if you make use of this offer, what about donating the difference to our campaign? You can do so right now by using the Paypal link below. Thank you!

PLEASE DONATE TO OUR CAMPAIGN

If every one of you on this list (over 6,000 people) gives just one pound, we could be much more active and promote the campaign more prominently.

Please donate now - every £ helps!!

Click [here](#) and you will be taken to Paypal

You do not need to have a PayPal account; scroll down the PayPal page and on your left you will find how to pay by debit or credit card.

And if you are a UK taxpayer, don't forget to send us the Gift Aid Form, which you can download [here](#).

Or get together with a few friends or patients, collect a donation from each and send us a cheque (made out to H:MC21) to

H:MC21
The Old Farmhouse
Filgrave, Bucks MK16 9ET

Thanks a lot!

That's it for this month.

Once again, a big thank you for all your support and your enthusiastic emails.
