Don't miss *Halloween Science - The Truth about Ernst & Singh*

NOW AVAILABLE FREE ON OUR WEBSITE

We have received a lot of positive feedback from those of you who have already read William Alderson's thorough critique of Ezard Ernst's and Simon Singh's book *Trick or Treatment?* Thanks to those of you who have emailed us. If we have not yet responded please bear with us; we will soon be in touch.

Halloween Science will give you many useful arguments in your own discussions with those who are sceptical or dismissive of homeopathy. It is a treasure of information for anybody who wants to help promote homeopathy in this country and elsewhere. Criticism is important and should be taken seriously as it furthers science, but most of the criticism of homeopathy has been the same for the last 200 years. This is a rather boring state of affairs, yet we still need to respond to it, as many of those who criticise us do so because they have been taught to trust mainstream, orthodox medical reasoning. *Halloween Science* also shows how that reasoning has flaws which even Ernst & Singh admit to, albeit inadvertently.

This [link](#) will take you to the relevant page on our website, from where you can download a one page abstract, a ten page summary or the whole, 120 page document for free. Donations welcome!

Feel free to send your comments about Halloween Science to info@hmc21.org. Please note that we may not respond to emails from people who do not provide a full name and postal address. We welcome debate and discussion, but it has to be open and genuine.
